

Pure Performance. No Gimmicks

Raycatcher[®] Capturing Technology

The dome is designed to capture maximum sunlight with its crystal clear surface, Raycatcher dome is the optimum in light capturing technology.

Miro-Silver[®] Tube

SolarBright[®] tube is manufactured to last for life, it has the highest reflectivity for an anodised surface with capability to deliver pure daylight colour. SolarBright[®] tube will perform consistently and is free of gimmicks and lamination.

Auroramax[®] Diffusion Technology

SolarBright[®] triple lens diffuser technology is designed to allow the light to enter rooms and spreads the pure light evenly with no hot spots. Simply, more light & less heat.

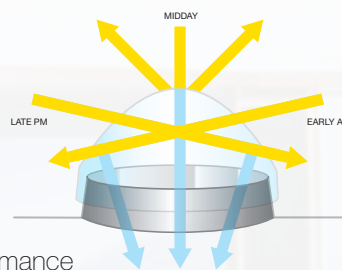

Model	Potential Covering Area	Potential Length
ML250	18m	7m+
ML400	25m	10m+
ML400H	28m	12m+
ML550H	32m	15m+

Cutting edge technology in daylighting

Raycatcher[®] Dome

- Exclusively engineered & designed
- Captures maximum light possible during the daylight even some low angle light.
- Reduces some of midday light.
- Hail resistant shape
- Crystal clear surface for maximum performance

*Image of light routes for illustration purposes only

Seamless Flashing

- Leak-proof roof system
- Seamless injection moulded part
- Designed to suit most roof types
- Engineered with pitch for maximum performance

Miro-Silver[®] Tube

- Mirror finished tube
- Durable Solid Aluminium - not laminated polymer
- Transmits pure white light
- Highest reflectivity at low sun-angle
- It will not yellow, crack or peel after prolonged UV Exposure
- 20 year warranty

Optical Diffusion System

- Exclusive & modern design
- Unique triple layer diffuser kit
- Blocks harmful UV transmission
- Advanced Fresnel lens for optimum performance

Performance, quality plus choice

The choice is yours...

SolarBright daylighting systems give you exceptional performance plus a unique range of functional options.

Diffusers

Prismax[®]

Most widely used diffusion system in the lighting industry. Excellent efficiency in light transmission and glare reduction.

Warm

New and modern diffuser with a matt satin surface which produces a warm and soft light.

Aurora[®]

Transmitting and spreading light effectively in any room.

Auroramax[®]

The new Fresnel micro-optic lens is engineered to transmit pure natural light evenly regardless of the sun angle. AUORAMAX[®] the ultimate diffusion lens.

The Hybrid Diffuser

- Large square diffuser to bring in even more light
- Seamless stylish décor trim
- Multiple sealed lenses for optimum energy efficiency
- Mirror finished tube for maximum performance

Options:

Prismax[®] | Warm | Aurora[®] | Glazy[®]

Add style & elegance

Stylish Trims

White

Our standard décor trim is the most acquired feature that blends with majority of ceilings.

Glass Overlay

Add class to your diffuser with a glass look feature.

Stainless Steel

Designed to match other Stainless Steel light fixtures on your ceiling.

Glass Eclipse

Designed to add a touch of elegance with a glass look.

Electric Light Inside Tube

Add electric light to your skylight for night use.

Light Dimmer

With our new solar powered dimmer the daylight coming out of Maxlight can be controlled and adjusted with touch of a button of a remote control.

Combo Skylight & Ventilation

The new combo add-on ventilation kit offers the convenience of skylight and ventilation in one. This modern and stylish feature is perfect for bathrooms, laundries and other rooms that require daylight and ventilation.
